Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-2,6-8,12-14 and 18-19 are rejected under 35 U.S.C. 102(e) as being anticipated by Dye et al. (US 2002/0145611 A1).

In regard to claim 1, Dye provides for a calculator (Fig.20 element 660) arranged to calculate an output color (Fig.20 element 244) corresponding to an input color (Fig.20 element 615, paragraph 244); a cache memory arranged to cache a calculation result of said calculator in order to uniquely determine an output color corresponding to an input color (Fig.20 element 615, paragraph 276); a converter arranged to convert an input color to an output color in predetermined processing unit, by utilizing said calculator and said cache (Fig. 20 element 655, paragraph 282); and a controller arranged to control a caching method to be applied to a subsequent processing unit based on a cache hit rate per said processing unit (Fig. 20 element 620, paragraph 276).

With regard to claims 2, 8 and 14 Dye provides for an apparatus, wherein said controller controls an application area of the caching method based on the cache hit rate (Fig. 20 element 620, paragraph 276).

Art Unit: 2625

As to claims 6 and 12 Dye provides for an apparatus, wherein said apparatus performs color matching processing on an image (Fig.20, elements 660 and 244).

In regard to claims 7 and 13. See claim 1 above. They recite similar limitations as claim 1. Hence they are similarly analyzed and rejected.

As to claims 18 and 19. See claim 1 above. They recite similar limitations as claim 1. Except for a computer readable medium storing a program code for a control method of an image processing (Fig. 2A element 140, paragraph 87) hence they are similarly analyzed and rejected.

Objected Claims

2. Claims 3-5,9-11 and 15-17 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
